1 / 1 point

☒

⌵

function

☐

⌵

func

☐

⌵

define

Correct

5.
Which of the following best defines the relationship between **defining** a function and **calling** a function?

1 / 1 point

☐

⌵

A function can be defined multiple times in a single file

☒

⌵

A function can be called multiple times in a single file.

Correct

6.

Consider the following code:

```
1 <body>
2   <p> This is paragraph one </p>
3   <p onclick = "Hello()"> This is paragraph two </p>
4 </body>
```

The function Hello() will be called every time:

1 / 1 point

☐

A) The user clicks on any paragraph on the page

☐

B) The user places his/her mouse over any paragraph on the page

☒

C) The user clicks on the second paragraph on the page

☐

D) A and C

☐

E) The function is never called.

Correct

7.

What is wrong with this function definition?

```
1 function Hello(){
2   alert("Hello");
3   document.write("Hello on the screen");
4 }
```

1 / 1 point

☐

You can't use document.write after using an alert.

☐

The fact that you are outputting the message twice

☒

The semicolon after Hello()

Correct
