

3. Consider the following CSS rules:

1 / 1 point

```
1 @media all and (min-width: 500px){
2   div{
3     width: 25%;
4   }
5 }
6
7 div{
8   width: 80%;
9 }
10
```

What is the width of any div elements on a 750px screen?

80%

100%

25%

The div won't display since media queries must go at the bottom of the screen.

✓ Correct

4. Consider the following CSS rule:

1 / 1 point

```
1 div{
2   width: 80%;
3 }
4
5 @media print(){
6   div{
7     width: 25%;
8   }
9 }
```

Which of the following is a true statement?

The div elements will only visible only when the page is printed

The div elements will have a width of 25% only when the page is printed

The div elements will have a width of 80% only when the page is printed

✓ Correct

5. Which of the following code segments will keep people from being able to zoom in or out on your content?

1 / 1 point

```
1 <meta name = 'viewport' content='width=device-width, initial-scale=1, maximum
2 -scale = 1'>
```

1	<meta name = 'viewport' content='width=device-width, initial-scale=1'>	
2		

It is impossible to lock the zoom ability

✓ Correct

6. Breakpoints often correspond with common screen sizes for phones, tablets, and laptops.

1 / 1 point

True

False

✓ Correct

7. Wireframes should...

1 / 1 point

specify the layout, color, and content of your pages

specify the layout of your pages

specify the layout and content of your pages

✓ Correct

8. A key component of your wireframes should test

1 / 1 point

interaction

color schemes

code syntax

✓ Correct

9. Give an example screen width size for a mobile phone using pixels. (Just provide a number, and not the px!!!)

1 / 1 point

✓ Correct

Correct, most screens are at least 300px and less than 768px.

10. Which of the following is a **deprecated** media type -- meaning they are omitted in later versions. (You will need to search for this online it is not in the notes. But a lot of what you do with web design will require a little searching!)

1 / 1 point

all

braille

speech

print

screen

✓ Correct
